

We Are the

BEST STEEL SUPPLIER

and Provides High Quality To Global Clients.

Offer Price

- ✓ Delivering Engineered Solutions
- ✓ High Function Bar Wire Rod Products
- ✓ We can Offer All Types and Size to Sophisticated Needs Each Filed

International Trading is Professional, independent steel supply service provider active around the world

WHAT WE OFFERS

STRUCTURAL STEEL

Structural steel enhances construction productivity because of its shop fabrication while maintaining tight construction tolerances.

Architects praise the natural beauty of steel and are excited about exposing it in the design of their structures to emphasize grace, slenderness, strength and transparency of frame.

Structural steel allows the project architect a greater degree of expression and creativity in their design than any other construction material as they address both the functional demands of the building and unique identity of their client.

STAINLESS STEEL

Stainless Steel is not a single alloy, but rather the name applies to a group of iron bases alloys containing at least 10.5% chromium.

Other elements are added and the chromium content increased to improve corrosion resistance, improve heat resistance, enhance mechanical properties, and/or improve fabricating characteristics.

Stainless steel is one of the most sustainable material choices available to decision makers.

ALUMINIUM

Aluminum is an extraordinary versatile material.

The range of forms it can take (castings, extrusions & tubes, sheet & plate, foil, powder, forgings etc.) and a variety of surface finishes available (coating, anodizing, polishing etc.) means it lends itself to a wide range of products, many of which we use every day of our lives.

WHY CHOOSE US

We Believe in providing quality not just the first time, but every time

- ✓ High Customer Satisfaction
- ✓ Quality Product Delivery
- ✓ To provide quality services that exceeds the expectations of our esteemed customers
